Cappuccino cups & saucers
Espresso cups & saucers
Latte mugs or glasses
Complete barista and cleaning kit
Starter case of coffee beans
Delivery, installation, training and 12 months warranty

Please ask for prices for either rental, machine only or a complete package.

All Synchro models have the following features.

- Choice of colours: Red, Black, Orange or White
- High group heads for taller cups and latte glasses
- One or two stainless steel steam arms depending on model and hot water tap
- Manual group overrides
- Programmable pre-infusions
- Two to four filter holders depending on model

Choose from a range of optional extras to further enhance machine functionality and performance.

- Automatic Temperature Milk Steam, Steam Pipe & Cappuccinatore - not available on compact versions
When frothing milk the automatic temperature valve shuts off the steamer when the milk reaches a desired temperature, thus delivering consistency to your froth.
- Over Machine Electric Cup Warmer
When poured into a cold cup the temperature of a coffee decreases rapidly. The electric cup warmer ensures that your customers' coffees are not going cold too quickly.
- Illuminated Back Panel (for 2 group machine)
- Electronic Temperature Control

- Independent Temperature Control/TCI
The electronic temperature control device controls the water temperature of each separate boiler for each group.
Each group has its own 'personal' boiler allowing different water temperatures to be dispensed out of each group head. It also has a separate steam boiler.
- Digital Display

Synchro 1 Group espresso machine available with either a 4 or 7 litre boiler

Good looks and perfect for low volume sites.

- Dimensions: H 557mm x W 468mm x D 593mm
- Power Requirement: 13 amps
