All Synchro T2 models have the following features.

- Choice of colours: Red/Black or White/Blue
- High group heads for taller cups and latte glasses
- Two stainless steel steam arms and hot water tap
- Manual group overrides
- Programmable pre-infusions
- Three or four filter holders depending on model
- New ergonomic group handles
- Power saving mode
- Larger drink preparation platform
- Sidelights and downlighter

Choose from a range of optional extras to further enhance machine functionality and performance.

- Automatic Temperature Milk Steam, Steam Pipe & Cappuccinatore - not available on compact version.
 - When frothing milk the automatic temperature valve shuts off the steamer when the milk reaches a desired temperature, thus delivering consistency to your froth.
- Over Machine Electric Cup Warmer
 - When poured into a cold cup the temperature of a coffee decreases rapidly. The electric cup warmer ensures that your customers' coffees are not going cold too quickly.

- Independent Temperature Control/TCI
The electronic temperature control device controls the water temperature of each separate boiler for each group.
Each group has its own 'personal' boiler allowing different water temperatures to be dispensed out of each group head. It also has a separate steam boiler.
- Pod Adaptor
An adaptor for the group head to enable individually pre-packed coffee pods to be used.
- Turbo Steamer
The Turbo Steamer forces air into the milk whilst heating for a supreme frothing action.
- Hot Water Mixer Facility
This feature allows a variable amount of cold water to be mixed with the hot to reduce splattering.

Synchro T2 2 Group Compact espresso machine with 8 litre boiler

The T2 2 Group Compact espresso machine is perfect for mid volume sites where space is at a premium.

- Dimensions: H 585mm x W 685mm x D 610mm
